

PRECISELY!

Accurate

Laser Cutting

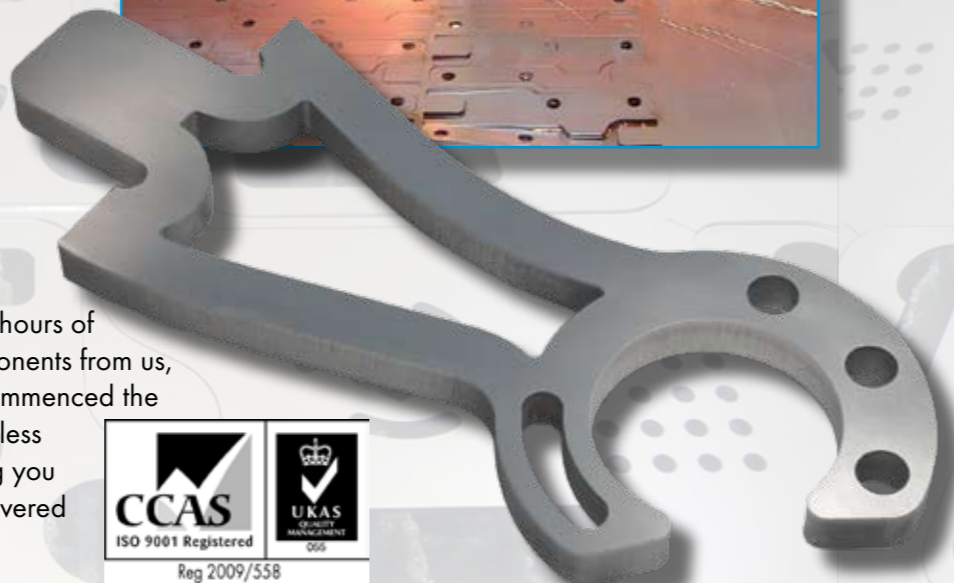

The UK's No1 Laser Profiling Service

Based in the heart of the Midlands, we at Accurate Laser Cutting Ltd service the manufacturing industry across the UK with our laser cutting capacity. We are in the forefront of technology and are fully committed to investing in the latest state-of-the-art manufacturing machinery. In the past eighteen months Accurate Laser Cutting has invested over £1,200,000 on laser cutting and folding equipment. All of this is backed up with the latest CAD/CAM software operated by our team of experts, this gives you the knowledge that we are the leaders in our field. With this continuing investment, you can be assured that you will always have access to the very latest technology.

Delivered to you on time every time

From quotation to delivery, quality and service is our core competence. We understand that waiting for quotations, together with long delivery lead times, can be extremely frustrating. That's why we aim to get back to you within four hours of your quotation request. Once you have ordered your components from us, we guarantee that within 24 hours, we will have already commenced the manufacturing process. In addition, because we run a seamless 24/7 operation, lead times are dramatically reduced giving you the advantage that your top quality components will be delivered on time every time!

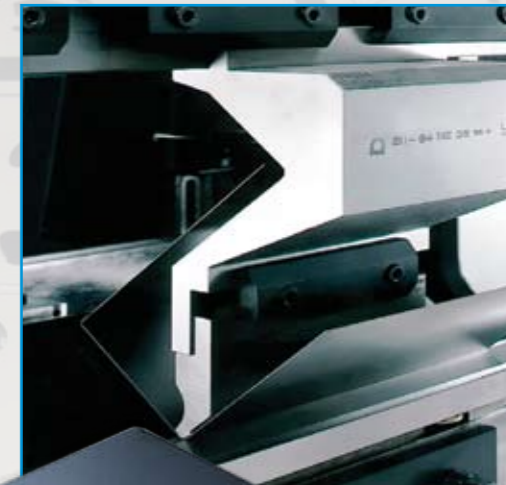

Forming your laser cut components - *PRECISELY!*

At Accurate Laser Cutting, we don't just offer laser profiling - we also offer that all-important secondary folding operation. Utilising the latest pressbrake technology and state-of-the-art CAD/CAM offline programming software, we can add value to your laser profiling. This service gives you the benefit of single sourcing your components, helping to reduce lead times on your orders and, as we manufacture under one roof, we will save you money too.

No drawing? No problem!

Don't worry if you don't have a drawing of your component. Our engineering team can precisely reverse engineer your components from a sketch or even a sample.
